Q: How long does it take for the ACC to review requests?

A: The ACC has up to 30 days to review and respond to requests once **all** of the necessary information is received from the homeowner and the application package is complete. The ACC will strive to meet timelines, however, due to the number of requests we ask homeowners to allow 30 days for the ACC to review.

Q: What does standard application mean?

A: DSI is constantly trying to improve the homeowner's experience. After reviewing our ACC application process and listening to feedback from you, we have found that some improvements could be made to the application process. The structures listed below tend to follow the same set of
